Wireless 150Mbps N-Lite Extender appRP02V2

Repeater for wifi networks for those seeking a definitive solution to extend the range of their wireless network. Connected to an electrical outlet, it repeats the wifi signal to distant areas such as patios, terraces or furthest rooms. For the most demanding users, it can also be used as an access point or in client mode.

With this repeater, any wireless network can be extended almost immediately, all you need is an available electrical outlet in the range of the router.

One of its most outstanding feature is its speed; 150Mbps with quick and easy setup in minutes.

Now there is no excuse to extend your wifi network!

PRODUCT FEATURES
